Homework Timetable for the Senior School (v1.4)

Most of this document has to do with homework in classes 6 to 8 but teachers of classes 9 and 12 should be aware of the maximum time that should be allotted to homework each night. Please note that homework can only be set FOR the days indicated and should not be of a duration of more than indicated in the table below. Homework also includes revision for any tests set.

This means that students will do the homework on the day indicated. An easy way to explain this is using French in Class 6A as an example. There is a French lesson on Thursday so the French teacher must set homework to be done on Wednesday evening. Notice that it does not matter when he sets the homework, the important thing is that the homework is to be done on Wednesday night. The only subject this does not work with is Computer Studies because they only take it once a week. If they do it on the night indicated they will be able to complete it in good time.

Class	Homework Duration
6 and 7	½ an hour per subject (Maximum total therefore 1 ½ hours)
8	¾ of an hour per subject (Maximum total therefore 2 ¼ hours)
9 – 12	No more than 3 hours per night.
