   a. The researcher decides the type of the data suitable for the study and chooses the research techniques
   b. He presents the results to the concerned parties
   c. He decides to study the level of intelligence of those children
   d. He writes the report , and confirms that those children are more intelligent than the others who have siblings
   e. He assumes that those children are more intelligent that the ones who have siblings
   f. He collects data related to children from different schools
   g. He refers to several researches and theories concerning this subject
   h. He classifies the data in statistical tables

10. You are requested to prepare a questionnaire to determine the evolution of the intergenerational mobility in Lebanon, choosing 3 of the following situations: Economic- social – cultural -geographic. Indicate the essential condition to attain the objective of this questionnaire. (1pt)

1.1 Cultural educational condition

1.2 Political condition

1.3 Socio economic condition

2.1 conflict

2.2 Social adaptation

2.3 social change

2.4 selectivity

3 Difference between people in economic and social domains because it is related to the concept of social discrimination while all others are related to social stratification

4.1As a result of the Lebanese war and the weakness of the role of the government , the family and the sect played an important role in decreasing social problems and avoiding social services.

5.1 The democratic system is distinguished by its flexibility and allows the social movement for adopting the rule of competency and equality. Any example that clarifies the relationship, as whey any member of the popular classes gets a high social status in the democratic system through his degree, education and his achievements

5.2 Values direct the behavior since they are personified through it/ or values organize the socicty, express its aims and become ideals incorporated in the behavior/ or what we call group character and the behavior that results from it are based on social values/ The courage behavior in the values of tribal societies and the libertine behavior in values of the western civilizations

5.3 Selectivity in the totalitarian system is based on elites who are selected such as those in the ruling party etc.

6 True, because mechanical solidarity is based on mechanical loyalties and belongings(the family, the tribe …) and if it was transformed to an organic solidarity , it frees the individuals from the narrow circle of his belongings, in order to communicate with the other categories and groups that constitute the society; such a communication has a contractual and harmonious from that corroborate national unity

7 Natural change justification: because it is slow and takes place over long periods of time….

7.2Geographical mobility/ professional mobility : the spread of the means of communication and transportation contributed to limiting geographic barriers and facilitated the opportunities of professional or geographical mobility. For example, when a farmer moves from a rural area and works in another domain …..

8. Group 1 : characteristics of less developed countries: weakness in organizational abilities – wasting public funds – weakness in basic services

While group 2 is characteristics of developed countries

9. The following steps describe a sociological research about children with no siblings. Rewrite the steps in the proper order according to the methodological sequence(2 pts)
