This is a Class 2 exam

Lebanon Evangelical School
for Boys and Girls
Loueizeh - Baabda

Stage Exam 05

27APR2026

Do NOT write in this box. Your MARK will be placed here.

Subject :	English	
Class :	9B, 9C and 9E	
Teacher :	Mr. Oliver Shartoony	
Duration :	1 hour	
Your name :		*Time taken to complete exam*
Your Class :		
Exam Room :		
How many sheets, including cover sheet :		

- Do not open this paper until the teacher in charge instructs you to do so.
- The most important thing to remember in taking an exam is NEVER PANIC.
- If you are caught cheating in this exam, you will be awarded zero for ALL exams that are taken on this day.

Read the selection below in which the writer sheds light on the positive effects of technology in the field of education, and then answer the questions that follow.

Technology and the Education System

1 Technology has become an important part in different aspects of our lives but mostly in our education system. This is evident in the increased use of technological devices– from smart phones and boards to computer labs and online classes. Evolving technology in schools helps disabled children attend school with minimal aid, prepares students to use technology in the real world, and expands their abilities to acquire more knowledge about the world.

2 The new advances in technology have made it easier for students with both physical and mental disabilities to attend school. Recent innovations in wheelchairs have allowed students with physical disabilities to participate in sports with their fellow students. Along with wheelchairs, new speaking devices, like the electronic pointing device and sip and puff system, have been introduced to enable students with speaking and physical impairments to communicate. These devices can be used with a computer program that speaks out commands, comments or words, allowing the user to speak and communicate with other students and teachers. Furthermore, ear implants permit students who are profoundly deaf or severely hard of hearing to partake in school discussions and classes.

3 New advances in technology also prepare students for the real world, whether it is for a future job or investing and saving the money they will make from their jobs. In many classes, students use programs like Microsoft Word to write their essays and PowerPoint to do presentations. In the past, business students used Excel sheets to keep track of the stock market and programs to learn how to invest in it. Now, by learning how to use the computer to trade, **they** will be better equipped as adults to invest in stock markets and to keep track of their funds and investments. Later on, these skills will become useful for designing business cards and posters for a job or business. Through all these opportunities provided by technology in classes, students can use their knowledge to endorse themselves in the workplace when they are adults.

4 Advancing technology has given students more opportunities to interact with the world and widen their knowledge. Students can skype with people around the world. This makes **them** more cultivated and open to other countries and cultures. Students have become more aware of events that are happening all around the world. For example, social media have made it possible for people in different countries to watch Soccer Leagues live and celebrate the results. Without technology, this would never have been accessed by millions of people worldwide. In addition, students can publish their work online and write blogs for others to read.

5 Technology will always be evolving and advancing. It will continue to make life easier for disabled students, prepare students for future jobs, and educate them about the world. Technology and education will always go hand in hand as we live in a technology-influenced world.

Questions

A. Answer questions 1-3 in complete sentences, using your own words.

1. Based on Paragraph 2, state two effects of technology on disabled learners. **(02)**
2. Based on Paragraph 3, what skills should students have to succeed in the workplace? Mention **four** of these skills. **(02)**

Answer Key

A.
1.Technology has allowed disabled learners to easily attend school. Physically disabled students can now participate in sport activities just like physically abled students. Technology has also permitted students with speaking impairments to communicate with teachers and other students. Moreover, students with hearing problems are also able to participate actively in class discussions through ear implants. **(02)**
2. To succeed in the workplace, students should make use of different skills: Computer skills, presentation skills, investing and trading skills, designing skills (cards and posters), and writing skills. **(02)**
3. Technology has influenced communication positively/ in a positive, beneficial, favorable, advantageous way. With technology, people and students are given more chances to interact and communicate effectively with other people anywhere. Also, technology has allowed people to be in contact with different people from other cultures. Moreover, through social media, students are able to share their writings online. **(02)**

4. b. Technology helps all kinds of learners. **(02)**

5. a. they refers to (business) students. **(0.5)**
   b. them refers to students. **(0.5)**

B. (02)
1. acquire
2. partake
3. equipped
4. cultivated

C. (02)
Extract A best completes Paragraph 2.
Extract B best completes Paragraph 4.

D. (02)
1. The manager wanted to know why the customer didn't pay the debt.
2. Under no condition will the students leave the class without signing the paper.
3. I will tell him the good news when I see him tomorrow.
4. Modern education emphasizes values like freedom, respect, and tolerance.

E. (05)
1. Millions of people have never accessed this information.
2. If they had been invited, they would have attended the ceremony.
3. The man, who is wearing a blue jumper, is in the garden.
4. He asked her why she thought it might be dangerous.
5. She was impressed by the outstanding performance.
6. Clients, who visit a business exhibition, should be welcomed properly.
7. Mrs. Brown asked me if I was still preparing for the following day's test.
8. Not only did the father cry, but he also laid his head on his wife's shoulder.
9. People are encouraged (by LMT) to go on hiking trips across Lebanon.
10. Not only does the internet ruin the real relationships, but it also puts its users under pressure.
